

SUMMARY

Frontend-focused Software Engineer specializing in high-performance, accessible web applications using React.js, Next.js and TypeScript. Experienced in enterprise-scale interfaces with bilingual Arabic/English support and full RTL optimization across corporate, healthcare and e-commerce domains. Strong track record delivering production applications including corporate websites, ERP dashboards (37+ pages) and complex business platforms. Security-conscious developer (CompTIA Security+ in progress), passionate about pixel-perfect interfaces and Saudi Arabia's Vision 2030 digital transformation.

PROFESSIONAL EXPERIENCE

SAP Application Support Consultant

May 2025 — Present

WISYS (Al Watania Information Systems) · Jeddah

- Provide L1/L2 functional support for SAP S/4HANA modules (FI/CO, MM), analyzing business process issues and coordinating resolutions.
- Resolve 30+ support tickets monthly with systematic troubleshooting in a business-critical enterprise environment.
- Collaborate with business analysts and end users to gather requirements and support configuration.

Freelance Software Engineer

2023 — Present

Self-Employed · Saudi Arabia

- Delivered 3 client websites with bilingual AR/EN support and full RTL optimization, achieving 90+ Lighthouse scores (React, Vite, Framer Motion).
- Built Rameem Medical responsive interface with 500+ product catalog, smooth 60fps animations and optimized Core Web Vitals.
- Developed a complex healthcare dashboard with real-time data visualization, role-based UI components and accessible form patterns (Next.js, TypeScript, TailwindCSS).

Software Engineering Intern

Jun 2024 — Aug 2024

Saudia Technic · Jeddah

- Developed 3 interactive Power BI dashboards with data visualization components using Oracle SQL for executive decision-making.
- Gained enterprise environment experience; researched ISO 20000, ISO 27001 and ITIL compliance frameworks.
